Subject

Framework on monitoring tools for intraday liquidity management

Background

The Basel framework on monitoring tools for intraday liquidity management introduces a new reporting framework that will enable banking supervisors to better monitor a bank's management of intraday liquidity risk and its ability to meet payment and settlement obligations on a timely basis along with providing supervisors with a better understanding of banks' payment and settlement behaviour. This framework includes:

- the detailed design of the monitoring tools for a bank's intraday liquidity risk;
- stress scenarios;
- key application issues; and
- · the reporting regime.

SAMA has conducted a consultation process with the Saudi Banks in the development of this final regulation, which is attached in the annexures containing:

- Annexure 1: Monitoring tools for intraday liquidity management (available on BIS website (http://www.bis.org/publ/bcbs248.pdf).
- Annexure 2: SAMA's position on National Discretion
- Annexure 3: Intraday liquidity template
- Annexure 4: Frequently Asked Questions (FAQs) and answers

Implementation date

These rules are applicable from 1 January 2017 as specified in the Basel document.

Thamer M. AlEssa

Director General of Banking Control
